Enjoy delicious, filtered water on tap

We all know the importance of hydration to aid a healthy mind and body. So why not hydrate yourself in the best way possible, with delicious, filtered water!

Our range of drinking water filters are designed to remove the impurities from your water supply leaving you with delicious tasting water on tap.

Chlorine

Chlorine is added to a water supply by water companies. It disinfects the water but can leave a nasty taste and smell

Removal benefits: Removing chlorine will improve the taste and smell of water.

TASTE PURE WATER
WITH A WATER FILTER!

Limescale

When rainwater passes through the ground in chalk and limestone regions it picks up calcium and magnesium along the way.

Removal benefits: Without these minerals your kettle will remain shiny and your tea will stay scum free.

LET IT SHINE
WITH A WATER FILTER!

Lead

Lead can enter the water via pipes connecting a property to the mains. The risk is greater in pre-1970s houses.

Removal benefits: Lead interferes with a variety of body processes and can be toxic to many organs and tissues.

AVOID THE RISK
WITH A WATER FILTER!

Look after your family

Keep them safe and healthy

Choose the best drinking water for you and your family.

Keep your kids hydrated and fill up their school water bottles.

Look after your wallet

And reduce your environmental footprint

No more waiting around for the filter jug to be full again.

It can take up to 450 years for a plastic bottle to bio-degrade.

Better tasting food and drinks

Wait until you taste the difference

Cook your food with only pure, filtered water.

Why would you cook with impurities in your water?

Scale-free kettles and scum-free drinks

Simply delicious

*Refer to chart on reverse for filters that specifically remove limescale.

Enjoy the perfect cuppa without the layer of film on the top.

Great tasting drinks with all the flavour.

We have the perfect solution

AquaTaste

The AquaTaste gives you delicious, filtered water on tap, saving you a fortune on bottled water.

With a granular activated carbon filter, the AquaTaste will improve the taste, smell and colour of your drinking water.

- ✓ Reduce chlorine and sediment.
- ✓ Simple and easy to install.
- ✓ Save money on bottled water.

AquaScale

The AquaScale makes drinking water taste great and eradicates the problems caused by limescale.

Now is the time to reduce the hardness ions, calcium and magnesium, in your water and eliminates limescale build-up in your kettle, iron and food steamer, keeping them in pristine condition for longer.

- ✓ No impurities.
- ✓ Improved taste, smell and colour.
- ✓ Keep kettle in perfect order.
- ✓ Filtered water from 3p per litre.

AquaGuard

The AquaGuard gives you delicious, ultra-filtered water on tap, with an extra level of protection for all the family.

With a block carbon filter AquaGuard eliminates sediment, chlorine, pesticides and insecticides, as well as lead and cysts.

- ✓ Delicious, ultrafiltered water with added protection.
- ✓ Reduce the risk of consuming lead and pesticides.
- ✓ Fitted with a MacGuard™ filter, easy to use and easy to install.

Why choose a Kinetico water filter?

World No.1 in water treatment

Our water experts design and engineer smarter products to create the best water treatment solutions in the world.

PureMometer™

The puremometer will indicate when the filter cartridge needs to be changed.

Carbon Filtration

Highly absorbent carbon filters attract and adsorb impurities from the water.

MACguard®

Filter will shut off automatically when cartridge has expired to ensure only filtered water is available on tap.

Please refer to the filter range chart overleaf, to determine which of the above features are relevant to which product.
